## Create a cloud object storage service

### Step:1

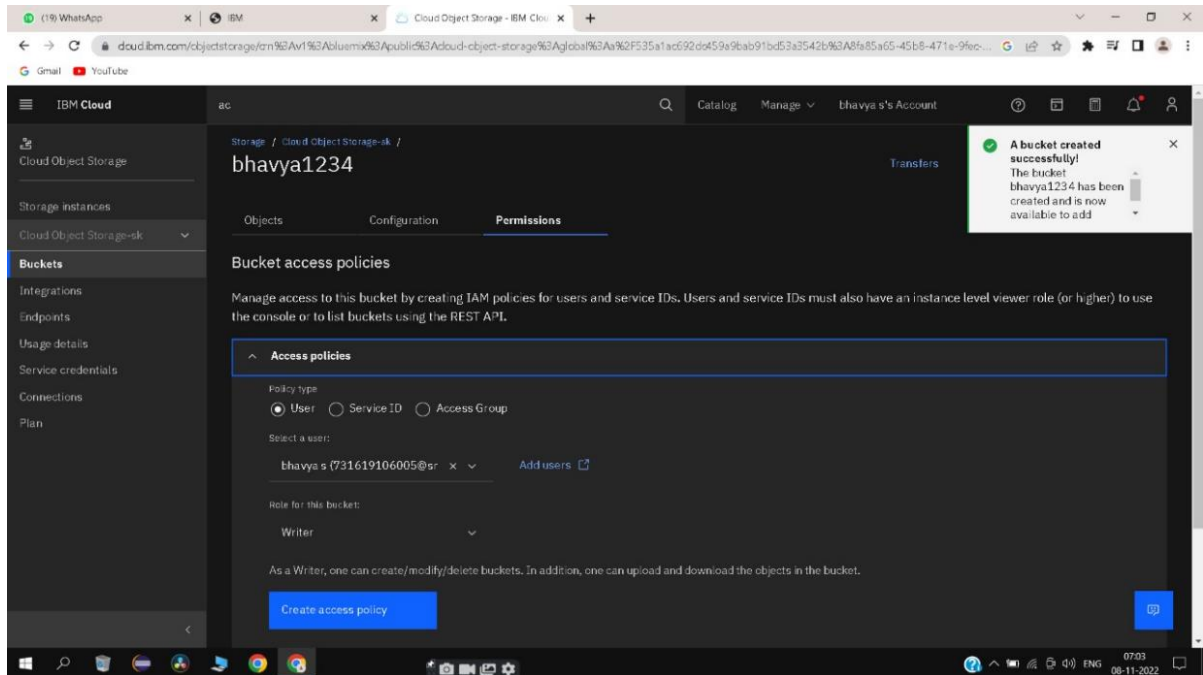

### Step 2:

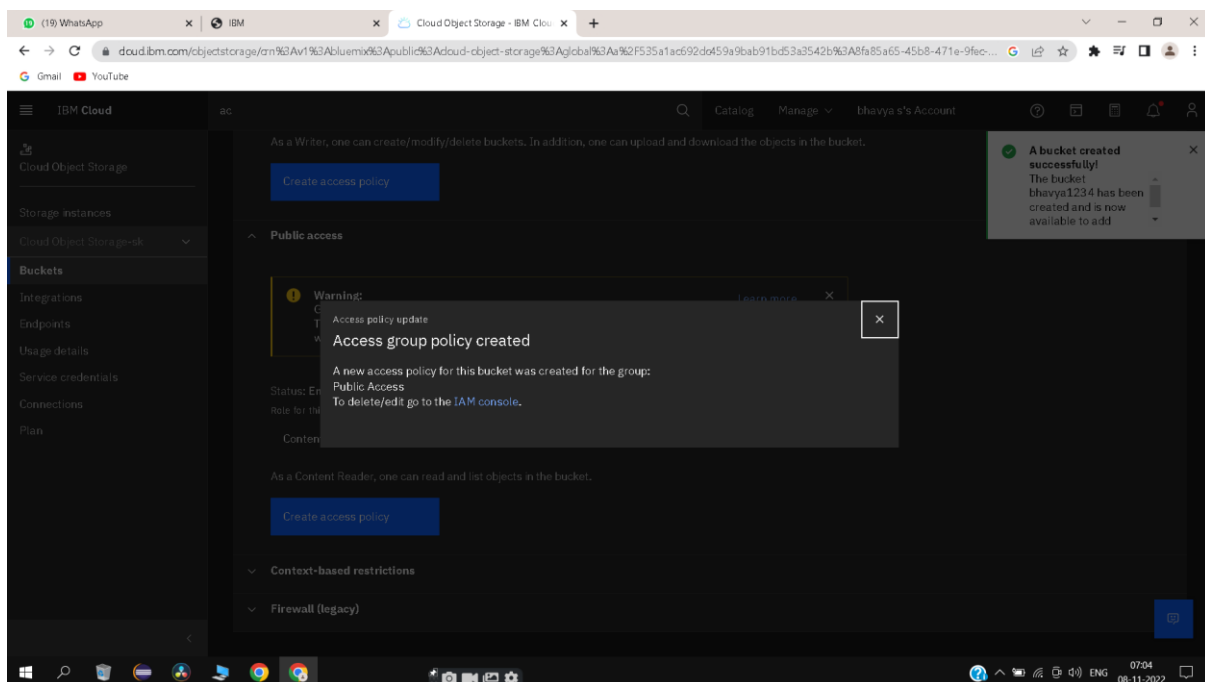

S

## Step 3:

## Step:4

## Step :5

The screenshot displays the IBM Cloud console interface. The left sidebar shows the navigation menu with 'Service credentials' selected. The main content area is titled 'Service credentials' and includes a sub-header 'You can generate a new set of credentials for cases where you want to manually connect an app or external consumer to an IBM Cloud service. [Learn more](#)'. A search bar is present above a table of credentials. The table has columns for 'Key name' and 'Date created'. One credential is listed: 'Service credentials-1' created on '2022-11-08 7:07 PM'. Below the table, a JSON snippet of the credential details is shown, including fields like 'apikey', 'endpoints', 'iam\_apikey\_description', 'iam\_apikey\_name', 'iam\_role\_crn', 'iam\_serviceid\_crn', and 'resource\_instance\_id'. A notification banner at the top right states 'A bucket created successfully! The bucket bhavya1234 has been created and is now available to add'. The bottom of the screen shows the Windows taskbar with the time 07:07 and date 08-11-2022.
